

CLASS-G PEER REVIEW

Class-G® was developed in cooperation with an exceptional group of qualified individuals from a multitude of professional backgrounds. The Peer Reviewers volunteered their time to review and provide feedback on the Class-G Checklist to test the relevance, practicality and positive impact of its sustainable substance. Our reviewers are committed to the availability of online green certification for buildings and businesses. In order to maintain high standards and to provide additional credibility to our program, our Peer Reviewers are neither employees of, nor have a financial interest in Class-G®.

Many thanks to our dedicated team of Peer Reviewers!
